## **Clumber Park Hotel gets planning go ahead for extension and spa**

The planned 27 bedroom extension and spa development has been given an unconditional green light by the local planners. Moorgarth managing director, Tim Vaughan expressed his delight at the speed with which the application had progressed. "Our team did a really thorough job of preparing the application with the result that we were able to ensure that it progressed smoothly. That is a great start to the project."

Work is expected to start later in the summer with a view to the development being complete in early June 2008.

Hotel partner, Derek MacDonald commented, "we are starting to see a great deal of demand for the additional rooms and our customers are particularly excited about the new spa. Our initial refurbishment is helping us to trade at levels significantly above the previous year. We have one of the largest conference and wedding facilities in the area and will really benefit from the new development"
